Greetings from Little Egypt, located in deep Southern Illinois....
This is Pulaski County, a rare one, and TNX for nice QSO!
My latitude is 37.120 degrees north and my longitude is 89.169 degrees west.
This is 13 miles north of the confluence of the Mississippi and Ohio Rivers.
The climate here is humid continental and the nickname is 'Little Egypt'.
Rig hr is a Yaesu 757 GX with a multiband dipole or a ground plane at 50 watts.
I am a county hunter and would like the county from which our QSO originated.

73's and TNX!
